

My Climate Change Icons

Each of the 17 Global Goals has its own icon (or symbol) with a picture that shows what that goal is about. Try to create your own icons for what is happening as our earth heats up. If you do not have time to draw them all, just do one!

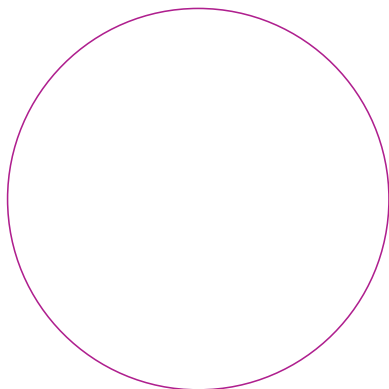

Here are some examples of the Global Goal icons.

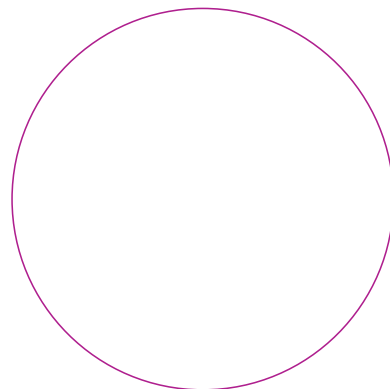

Glaciers and ice sheets are melting

Seas are rising and getting warmer

Storms are getting stronger

Some places are getting drier

Want to go further? Check out the second part of this activity on the next page.

Create a Matching Activity

Ask someone at home if you can test them! First, cut out your icons. Paste or glue your icons in the circles on the left. Remember to mix them up so that the icon **does not** line up with the correct climate change description. Then ask your brother/sister or an adult in your house to see if they can match each icon with the correct description!

Paste your
icon here

A. Glaciers and ice sheets are melting

Paste your
icon here

B. Seas are rising and getting warmer

Paste your
icon here

C. Storms are getting stronger

Paste your
icon here

D. Some places are getting drier
